I'm Kadir, Junior Full Stack .NET Developer. I like to constantly learn, develop, produce, and teach what I learn.

I completed 3 Full Stack Projects on .NET. I continue my other projects and make sure to keep my github page updated. Dealing with these projects gave me serious experience. Projects on .NET Core WEB API and MVC include many technologies in N-Tier architecture. I experienced concepts and technologies such as AutoMapper, FluentValidation, SeriLog, Identity, SignalR, Ajax in these projects. On the database side, I have generally used MSSQL and I am trying to master the T-SQL language, but I am also aware of the power of PostgreSQL, I try to use and experience PostgreSQL in my projects. My Angular framework knowledge is at beginner level, but my training continues. I have knowledge of HTML, CSS, Bootstrap and I have experienced them in my projects.

Technologies I am interested in;

- Programming Languages: C#, Swift
- .NET Technologies: Asp.NET Core, Web API, MVC.
- Database Systems: MSSQL, PostgreSQL
- Web Technologies: HTML, CSS, JavaScript, Bootstrap, Angular.
- Version Control: Github

🎓 EDUCATION

2023 January – 2025 July Mersin, Turkey	**Associate Degree / Computer Programming, Anadolu University** I started Computer Programming Associate Degree
2017 January – 2019 Kocaeli, Turkey	**Bachelor of Business Administration - BBA, Anadolu University** I completed bachelor degree of International Relationship.
2010 January – 2012 January Kocaeli, Turkey	**Associate Degree / Information Technologies, Turkish National Defence University** Operations Management · English · Spanish · Foreign Languages, Crisis Management, Time Management
2006 January – 2010 January Bursa, Turkey	**Computer Programming High School, Yeşilyayla Technical High School** Basic algorithm with Visual Basic, Web structurues, Cisco exprience

🧠 SKILLS

Foreign Languages • Operation Management • International Relationship

Time Management • Crisis Management • C# • .NET Core • Web API • .NET MVC

T-SQL • MSSQL • PostgreSQL • OOP • Angular • HTML 5 • CSS • JavaScript

iOS Development • Computer Operations • Cross-Cultural Communication • jQuery

Bootstrap • AutoMapper • FluentValidation • Serilog • EntityFramework • Dapper

💼 PROFESSIONAL EXPERIENCE

|	
2023 September – present İstanbul, Turkey	**İstanbul Eğitim Akademi, Full Stack Developer Trainee** With Istanbul Education Academy, I had the chance to take my passion, software development, to the next level. With the Full Stack Developer training, I am confidently on my way to becoming a software developer who is familiar with many .NET-based technologies.
2012 January – 2024 February Kocaeli, Turkey	**Turkish Navy, Information Technology Officer** I served in the Navy as an Information Technologies Petty Officer for approximately 11 years. During this time, I gained many skills such as time discipline, teamwork, hierarchy and crisis management.
2019 January – 2023 January Kocaeli, Turkey	**NATO Communications and Information Agency (NCI Agency), Communications and Information Agent** I participated in various missions within the scope of cooperation with NATO. In this context, with the influence of my International Relations graduation, I had the chance to work in multinational teams, including personnel speaking different languages, by creating an effective working environment with the personnel of NATO member countries. This gave me crisis management, time management, teamwork and effective working skills in different environments, albeit in different languages.

📂 PROJECTS

2024 January –
2024 January

Traversal Travel Application, ASP.NET Core MVC - Web API ↗
- I finished the YouTube series of my teacher Murat Yücedag. This project gave me incredible skills and a nice experience of real-time project. ASP. I used N-layer architecture and repository design pattern in my project with NET 6. Here are the technologies and principles I used in the project;

- The project consisted of 3 basic panels: Admin, User and welcome page. We used the N-Tier Architecture structure with the Repository design pattern, I developed the project with ASP.NET Core 6.0.

Technologies Included in the Training Series;

- N-Tier Architecture
- Generic Repository Design Pattern
- CQRS Design Pattern
- MediatR
- Unit of Work
- Fluent Validation
- Data Transfer Objects
- Entity Framework
- Code First SQL Database Management
- Identity
- Ajax
- AutoMapper
- SignalR
- Web API
- PostgreSQL
- Bootstrap
- Authentication
- Authorization

2023 December –
2023 December

BombBurger Restaurant Project, ASP:NET Core MVC
- I completed the Restaurant Management with SignalR course published by our teacher Murat Yücedağ on Udemy. The project was completely coded as an API project and SignalR was used in this project and I experienced managing instant situations.

- In this project, I used and experienced powerful technologies such as AspNet Core 6.0, Asp.Net Core Api, SignalR, Swagger, Dto, N Tier Architecture, MSSQL, Relational Tables, Html, Css, Bootstrap, JavaScript, Ajax, Entity Framework - Linq. 🛠 In addition to the project; Real-Time Messaging Real-Time Statistics Real-Time Notification Fast and interactive user experience with Ajax Basket and Reservation Transactions Email Sending Transactions.
